Lactose Breath Hydrogen Test

Please follow the below instruction for the best possible results from this test.

If you have any questions about preparing or collecting the test, there is a comprehensive video on our website at: http://www.mngastro.com/resources/patient-resources

It can be found under the “Videos” section, titled, “Your Lactose, Fructose, or Glucose Breath Test Experience”.

If you need further assistance after watching the video, please call 612-871-1145. If you have diabetes, ask your regular doctor for diet and medication instructions.

PROCEDURE DESCRIPTION

What is a lactose breath hydrogen test?

This test can determine if you have a problem digesting lactose products (i.e. milk, cheese, ice cream, etc.). Symptoms of lactose intolerance include diarrhea, gas, cramping, and bloating. When lactose is combined with the normal bacteria in the intestine, hydrogen gas is expired as you breathe. You will be asked to breathe into a series of breath collection devices and your breath will be collected and analyzed.

What are the possible complications?

This test is very safe. You may feel minor discomfort from diarrhea, gas, cramping or bloating.

What should I expect during my test?

First, a baseline breath sample will be obtained by breathing into the device. Then you will drink a lactose solution. After drinking the solution, you will wait 1 hour between each sample. Every hour for a 3-hour period, you will breathe into the device. You will collect a total of 4 samples.

What should I expect after my test?

Breath test samples must be returned/mailed within 3 days of collection. You will be able to resume your normal activities and diet. Your doctor will send you the results by mail in 9-12 days after your test is received.
PREPARATION

2 weeks prior to the test:

- Antibiotics must be completed 2 weeks prior to this test.
- No colonoscopies or barium studies 2 weeks prior to the test.

7 days prior to the test:

- Do not eat products that contain lactose, such as milk, ice-cream, yogurt, Lactaid milk, or other dairy products 7 days prior to the test.

1 day before the test:

- Avoid slowly digesting foods and high fiber foods (examples: beans, vegetables, bran, coarse breads).
- Please see the “Diet for Breath Tests” recommendations on the following pages for additional suggestions of foods to eat and foods to avoid.

12 hours before the test

- Do not have anything to eat 12 hours before you exam. You may only have water before the test.

Day of the test

- DO NOT smoke for at least one (1) hour prior to the test or any time during the test and avoid exposure to second hand smoke.
- DO NOT sleep, or exercise vigorously for at least one (1) hour before or any time during the test.
- Be sure the medical staff is aware of any recent antibiotic therapy or runny diarrhea since it can affect the test.

Failure to accurately and completely prepare for your exam may result in the need for an additional procedure and both procedures will be billed to your insurance.
Lactose Breath Test -- Patient Diary

Tube #1 Time: ______________________ (Baseline Sample)

Time Solution Consumed: _______________

Tube #2 Time: _______________________ (1 hour after solution)
Tube #3 Time: _______________________ (2 hours after solution)
Tube #4 Time: _______________________ (3 hours after solution)

**Please return this diary with your breath test kit**

Not returning this diary could result in having to repeat the breath test

Affix patient sticker here and on breath test kit

### Diet for Breath Tests

**Foods Recommended:**

<table>
<thead>
<tr>
<th>Breads, Cereal, Rice and Pasta:</th>
</tr>
</thead>
<tbody>
<tr>
<td>- White bread, rolls, biscuits, and croissant, melba toast</td>
</tr>
<tr>
<td>- Waffles, French toast, and pancakes</td>
</tr>
<tr>
<td>- White rice, Plain crackers, Saltines</td>
</tr>
<tr>
<td>- Cooked cereals: Farina, Cream of Rice</td>
</tr>
<tr>
<td>- Cold cereals: Puffed Rice, Rice Krispies, Corn Flakes, and Special K</td>
</tr>
</tbody>
</table>

**Breads, Cereal, Rice and Pasta**

- Breads or rolls with nuts, seeds or fruit
- Whole wheat, pumpernickel, rye breads and cornbread
- Potatoes, brown or wild rice, and kasha (buckwheat)

**Vegetables:**

- None

**Vegetables:**

- Vegetable juices
- Alfalfa sprouts, Beets, Green/yellow beans
- Carrots, Celery, Cucumber
- Eggplant, Lettuce, Mushrooms
- Green/red peppers
- Squash, Zucchini
- Broccoli, Cauliflower, Brussels sprouts, Cabbage, Kale, Swiss chard, Beans, Lentils, Corn

**Fruits:**

- None

**Fruits:**

- Any raw or dried fruit
- All berries, figs, dates, raisins and prunes
- Fruit juices and prune juice
- Apple sauce, Apples, pears, oranges
- Apricots, Bananas, Cantaloupe, honeydew Watermelon
- Canned fruits, Grapes, Peaches

**Milk/Dairy:**

- None

**Milk/Dairy:**

- Milk
- Cheese, Butter
- Ice cream, Yogurt

**Meat and other proteins:**

- Baked or broiled chicken, turkey or fish
- Eggs
- Peanut butter without nuts

**Meat and other proteins:**

- Tough, fibrous meats with gristle
- Beans, peas and lentils
- Peanut butter with nuts
- Tofu

**Fats, Snack, Sweets, Condiments, and Beverages:**

- Sugar,
- Chicken or beef broth,
- Coffee, tea,
- Plain cakes and cookies
- Gelatin
- Salt, pepper
- Pretzels

**Fats, Snack, Sweets, Condiments and Beverages:**

- Nuts, seeds, and coconut
- Jam, marmalade, and preserves
- Pickles, olives, relish, and horseradish
- All desserts containing nuts, seeds, dried fruit, coconut, or made from whole grains or bran
- Candy made with nuts or seeds
